

TECHNICAL DATA SHEET

HARTDUR E333 (RFE)

Description

HARTDUR E333 (RFE) is an established, universal cross-linker for adhesives based on hydroxyl polyurethane, natural, and synthetic rubber. HARTDUR E333 possesses excellent heat and solvent resistance, and it is particularly effective during the bonding of rubber products, especially when a light color appearance is a strict requirement.

Physical Properties

Appearance	: Clear yellow to brownish liquid
CAS No.	: 4151-51-3
NCO Content (%)	: 7.2 ± 0.2
Viscosity (cps, @20°C)	: approx. 10 sec flow time
Flash Point (°C)	: -5
Solid Content (%)	: 27.00 ± 1.0
Solvent	: Ethyl acetate

Package

0.75 kg/bottle (20 bottles/carton) & 180 kgs/metal drum

Shelf Life

6 months since production date.

Storage

Keep dry and store at 5 ~ 32°C
